

# BOOK OF CENTURIES

E. Anderson.

<sup>23p2pneu162</sup>  
For how to keep  
a Century Book  
See Page 42  
in P.U.S. Diamond  
Jubilee Book.

<sup>23p3pneu162</sup>

## PREHISTORIC PERIODS

Eolithie or Dawn Age - Perhaps 300,000 B.C.

Lower Palaeolithic Age - perhaps 180,000 B.C.

Upper Palaeolithic Age - perhaps 25,000 B.C.

Mesolithic Age - perhaps 10,000 - 8000 B.C.

Neolithic Age - perhaps 8000 - 3000 B.C.

Bronze Age - perhaps 3000 - 500 B.C.

Iron Age - about 500 B.C.

Although for the sake of convenience we use Stone age etc., it is important to remember that there is no sharp line of demarcation between the ages. Stone implements were still used after the discovery of metal and are often found in Round Barrows in conjunction with bronze. Bronze and iron also overlap.

There is still a stone age active in South-west Africa, and another in Dutch New Guinea.

i3p4pneu162

## EOLITHIC AGE.

*Pithecanthropus Erectus* - First trace of human remains found in Java.

Heidelberg man - Earliest remains found in Europe, dates back to about 200,000 B.C.

Piltown man - Earliest remains found in England.

All these men had thick skulls and they used pear-shaped lumps of flint for weapons.

13 p5 pneu162

CAVE PAINTING IN FRANCE OR SPAIN.

CAVE PAINTING.

13 p6 pneu162

### LOWER PALAEOLITHIC AGE.

After third Ice Age.

There are no human remains, but we find his implements, he began to sharpen flints, most tools were made of flint. They improved in skill by flaking. They began to use bone and wood.

The Chellean man found in France, roughly 80,000 B.C. He began to use fire.

LOWER PALAEO LITHIC AGE. (CONTINUED).

Time of the fourth ice age.

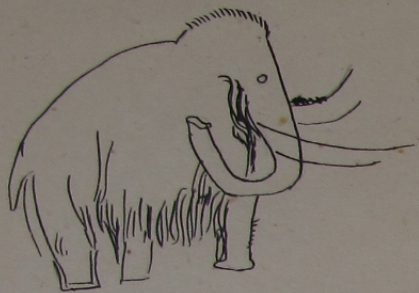

The Neanderthal or Mousterian man lived in Germany. He lived in cave. He was short and had an awkward body, a little neck, a wide nose, a protruding jaw and a little chin.

Very unhealthy bones were found which were swollen with rheumatism, which he lived in dampness, which may account for his rather sudden disappearance.

He made his implements from flakes of flint, and he used lance heads fastened to a post.

13 p8pneu162

MAMMOTH ON CAVE  
WALL.

13 p9pneu162

### UPPER PALAEOLITHIC AGE

The Cro-Magnon man was the first modern man, he had very fine features, it was a beautiful race of men who were well proportioned and appeared in Europe from Asia. The Aurignacians came from the Pyrenees, they occupied caves, did a great deal of hunting, and they made good fires. They worked in bone, ivory, and reindeer horn as well as flint. They were a race of artists, and they adorned the walls of their caves with pictures, they used red and yellow paint made from oxide iron also black made from manganese ore. They buried their dead with care, with shells and beads, and they left offerings of food beside the dead.

The Solutreans were a war-like race from the East they were not artistic. They lived much in the open, and liked to eat horses. They did not survive for very long.

The Magdalenians existed roughly 16,000 B.C. They were great artists, and they indulged in sculpture. They invented harpoons for fisheries. They harnessed reindeer and invented a sledge. They loved to draw in motion.

MESOLITHIC AGE.

Time that the British Channel was formed also the Mediterranean.

The Azilians - From the Pyrenees, the caves of Mar d'Azil.

They had no interest in painting on their walls.

They were great hunters, and they made many staghorn harpoons. The mammoth was now extinct so there was no more ivory. They had many pebbles covered with different signs. Dogs were used for hunting with man for the first time.

Maglemosians - they were great fishermen, they fished from rafts. There are many remains which were found in Kitchen Middens. They used amber, flint and bone, and they invented the earliest kind of pottery.

13 p11pneu162

POTTERY FROM LAKE  
DWELLING.

13 p12pneu162

### NEOLITHIC AGE.

The age of the cultivation of soil

Domestication of animals

The art of pottery is developed.

Grinding and polishing of stone tools.

Foundations of social life in Europe.

Great startling changes at this time.

Craftsmen were banded into guilds.

Village life began. Some people lived in piled dwellings built out onto the lakes.

They built an enormous stone monument, connected with religion (Stonehenge).

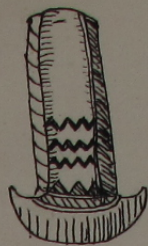

i3 p13 pneu162

## BRONZE AGE.

Copper was mixed with tin because it was stronger, this made copper.
